

Xamarin Forms Workshop

Install Xamarin

Please follow the Microsoft docs for installing Xamarin on either a PC (using Visual Studio 2017/2019) or a Mac (Visual Studio for Mac).

<https://docs.microsoft.com/en-us/xamarin/get-started/installation/?pivots=windows>

Verify Installation

Once you've installed Xamarin, verify your installation by downloading the [Todo Forms Sample](#) and building it.

<https://docs.microsoft.com/en-us/samples/xamarin/xamarin-forms-samples/todo/>

If you are using a PC, verify that you can deploy the Android version of the app to either an Android emulator or Android device. If you are using a Mac, you can deploy to either an Android emulator/device OR an iOS Simulator/Device.

Resources

if you're having trouble with any of the above, here are some resources you can turn to for help
